

This multiple award-winning guidebook helps professionals and parents sort out the often-quirky behaviours to determine whether a true disorder exists, along with practical suggestions. This second edition includes chapters on addiction, auto-immune issues, and learning disorders.

Included are:

- Diagnosis commonly given to gifted children and adults.
- Characteristics of gifted children and adults.
- Traits of diagnoses incorrectly given.
- Twice-Exceptional, e.g., gifted and learning disabled.
- Guidelines to avoid mislabelling.
- Parent-child relationship to problems.
- Issues for gifted adults.
- Selecting a counsellor or health-care professional.
